

The eCopy Suite for Canon imageRUNNERS

Transform color or black & white paper documents into information that is easily integrated with all of your business applications.

The eCopy Suite connects your color or black & white Canon imageRUNNER or document scanner to your company's e-mail and other networked enterprise applications for low-cost, easy, instantaneous distribution and management of scanned documents - at the copier or your desktop. eCopy provides a simple, easy to use solution for extending the use of your digital imaging system while leveraging your investment in corporate network infrastructures.

Benefits

Ease of Use

- > Enable ANYONE to scan and distribute paper documents allowing for wide adoption and a quicker return on investment
- > Preview image at the copier gives users assurance they've scanned the right document
- > Enable a digital copier's scanning function to be shared within departmental or enterprise networks
- > Does not require learning any new skills; is as easy to use as pushing the "copy" button

Security

- > Encrypt outgoing attachments with 128-bit encryption to comply with regulatory or internal security requirements
- > Authenticate users by entering their network password, ensuring no one distributes scanned documents from a different user account

Delivers Cost-Savings and Boosts ROI

- > Slash long distance fax and overnight courier costs
- > Recoup Scanning Costs
- > Enable cost tracking by client, department, project, etc.

Speeds Business Communications

- > Enable exchange of critical documents at local network and Internet speeds
- > Distribute paper-based information to decision makers in seconds confidentially and securely
- > Unlock knowledge stored in paper file cabinets

Send the document back to your desktop to edit or annotate in eCopy Desktop. Features include OCR to create editable text, document building which combines scanned paper and electronic files from multiple applications, and integration with existing e-mail, fax, and document management systems.

Product Detail

eCopy ScanStation

The eCopy ScanStation is a small-format touch screen that attaches easily to any scan-capable imageRUNNER or document scanner. Depending on the capabilities of your device, scans can be either in color or in black & white.

To make an eCopy, simply place the paper document in the imageRUNNER's paper tray and choose one of several "send" options. Options are shown as easy to read icons on the eCopy ScanStation touch screen and include: Scan and Mail, Scan and Fax, Scan to Desktop, Scan to Printer, and Scan to Document Management

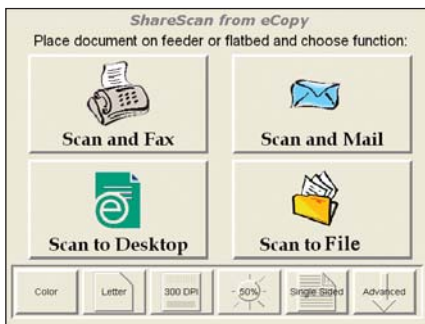

System. Custom "Scan to" buttons can also be created using the eCopy Quick Connect feature. For example, an eCopy ScanStation in a Human Resources department could have a "Scan to HR" button to input resumes in a specified folder on the network for later review.

Color documents are scanned with eCopy Xpert Compression Technology which reduces file size by more than 99% of the original size, while maintaining image quality. Files can then be easily transmitted across a network, digitally stored, and printed with superb text and image quality.

eCopy ShareScan

eCopy ShareScan drives the eCopy ScanStation and serves eCopies to the network. ShareScan integrates seamlessly with Microsoft Windows and Novell Netware networks. Administrators can manage user lists and create Scan Inboxes for multiple eCopy ScanStations from an administrative workstation anywhere on the network. Additionally, eCopy ShareScan enables connections into fax, e-mail, and document management applications from the device.

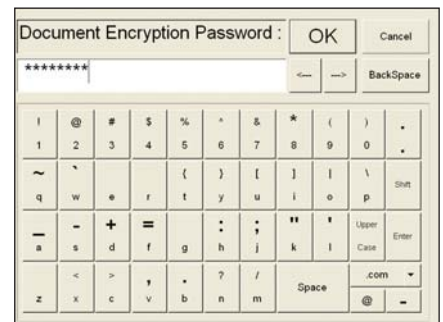

The eCopy ScanStation Process

Scan paper documents at the digital copier or scanner in either color or black & white, depending on the device, using the eCopy ScanStation with eCopy ShareScan software.

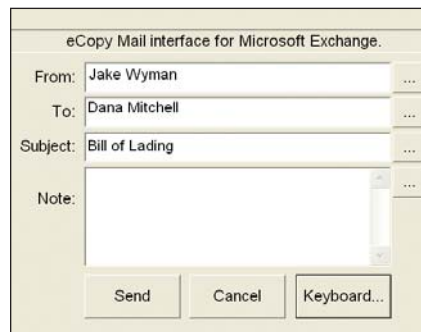

Preview your color or black & white eCopies before distributing them to the Internet or corporate network with eCopy ShareScan software.

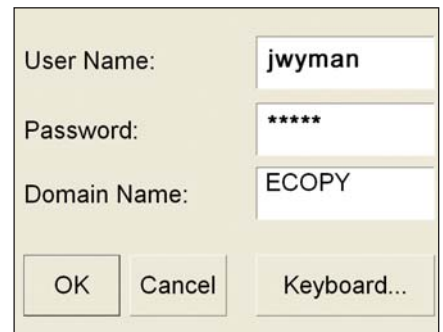

Send your eCopy securely with 128-bit encryption right from the eCopy ScanStation.

Access the Exchange Global Address Book, the Notes Address Book, or your LDAP directory to choose your recipient. E-mail addresses can also be keyed in manually with the help of shortcut buttons for .com and the @ symbol.

Include a personalized note to accompany the attached eCopy to the recipient.

Authenticate yourself by entering your network password. Administrators can monitor scan usage and frequency.

eCopy ShareScan Features

- > Full software suite ships complete with hardware and is ready to connect to either color or black & white devices (see list of devices on last page)
- > Integrates seamlessly with corporate e-mail address books including Microsoft Outlook/Exchange, Lotus Notes, and LDAP
- > Provides ability to send from personal e-mail accounts

- > Features preview screen for verification of image quality in either color or black & white
- > Create searchable text in scanned paper documents right at the eCopy ScanStation
- > Enter tracking information for easy billing right at the copier
- > Name your scanned paper documents at the eCopy ScanStation prior to distribution, giving the file meaning to the recipient.

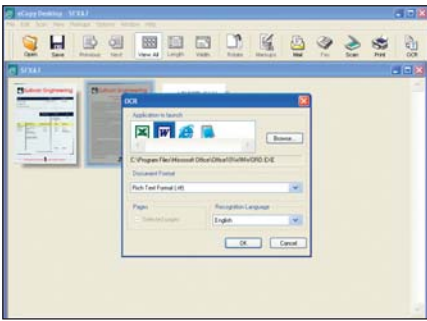

- > Integrates directly with network fax servers and fax services
- > Provides document security using password protection with 128-bit encryption for distributing and storing your scanned images
- > Change file format, encrypt documents, and create searchable text right at the eCopy ScanStation
- > Create custom "Scan to" buttons that enable configurable file naming and destination selection with eCopy Quick Connect

eCopy Desktop

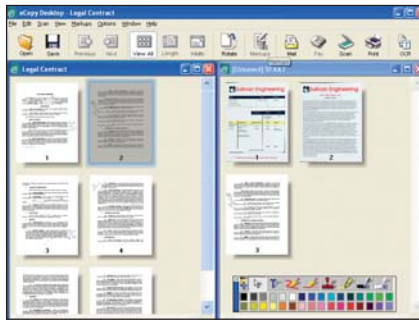

eCopy Desktop provides a powerful set of document workflow tools that enable individual users to treat eCopies of paper documents just like electronic files right from their desktop workstations. eCopy Desktop works with most network fax, e-mail, and document management applications: including, Lotus Notes Mail, Microsoft Exchange/Outlook, Captaris RightFax (NT Server), iManage, Domino.Doc, Documentum,

and others. Also available is the eCopy Viewer, a free small-footprint (1 MB) viewing application that enables any user to view and print an eCopy, right from their desktop.

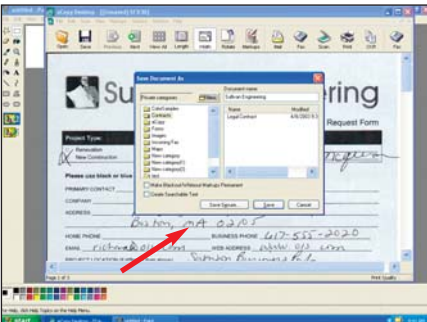

A View of eCopy Desktop

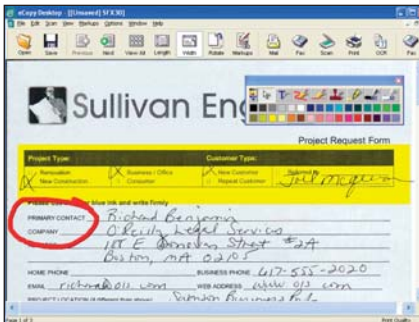

OCR scanned documents for conversion to MS-Word or Internet browser files

Combine scanned documents with files from multiple locations, such as MS-Word, Excel, and Power Point, into one file in eCopy Desktop.

Create searchable text from scanned documents for use with document management systems.

Markup scanned documents just like you would a piece of paper and distribute, right from your desktop

eCopy Desktop Features

- > Send scanned documents using the e-mail applications your company works with everyday, such as Microsoft Exchange/Outlook or Lotus Notes
- > Save scanned documents as files or to document management systems
- > Annotate documents using whiteout, highlight, markup, and "rubber stamp" tools; retain markup colors when printing
- > OCR scanned documents for conversion to MS-Word or Internet browser files
- > Save documents with attached text for indexing and searching in document management systems
- > Create a new document by combining scanned documents with electronic documents from MS Word, Excel, or several of other Windows applications
- > Send or export scanned documents as Adobe Acrobat PDF files
- > Provides document security using password protection with 128-bit encryption for distributing and storing your scanned images

eCopy Connectors

A "Connector" is the link between an eCopy-enabled scanning device, such as a document scanner or Canon digital copier, and a networked software application or service. With an eCopy Connector, the device becomes an easy to use "on ramp" to distribute paper documents by or into a chosen enterprise software application. The Connector is a software interface - developed using the eCopy ShareScan Connector SDK - between eCopy ShareScan software and a desired application or service. Connectors are offered as optional add-on modules to the eCopy Suite, and are purchased separately. They may be sold along with the eCopy Suite, or after the sale as an add-on purchase. eCopy currently offers Connectors for iManage, Domino.Doc, Documentum, Equitrac, and Copitrak.

eCopy ShareScan Connector SDK

The eCopy ShareScan Connector Software Developer's Kit (SDK) enables for the development of a "Connector" - or interface - between eCopy ShareScan and a networked enterprise application. The SDK runs under Microsoft Windows and developers should be familiar with the following:

- > Microsoft Visual C++ 6.0
- > COM based applications
- > The application to be integrated with eCopy ShareScan

eCopy Connector Features

- > Scan directly from a digital copier or document scanner to an existing customer application
- > Configurable button on the eCopy ShareScan screen

eCopy ShareScan Connector SDK Features

The eCopy ShareScan Connector SDK:

- > Dynamically link Canon imageRUNNERS (or scanners) and eCopy ShareScan into existing applications
 - > Human Resources
 - > Accounting
 - > Sales
 - > Operations
- > Save directly into application database
- > Validated information for application integration

SPECIFICATIONS

The eCopy Suite

SYSTEM REQUIREMENTS

Operating Environment	eCopy Desktop	ShareScan
> MS Windows 98	X	
> MS Windows XP	X	X
> MS Windows 2000	X	X
> Windows NT 4.0	X	X
Black and White Device		
> 64MB minimum (128MB recommended)		X
> 500MHz processor		X
> 233MHz processor	X	
> 64MB RAM/Win 98	X	
> 128MB RAM/Win XP, Win 2000, NT 4.0	X	
Color Device		
> 256MB		X
> 2.0GHz processor		X
> 300 MHz processor	X	
> 128 MB RAM	X	

COMPATIBILITY

E-mail		
> Lotus Notes	X	X
> Microsoft Exchange/Outlook	X	X
> Novell GroupWise	X	X
> Other MAPI compliant mail applications	X	
> Mail servers supporting LDAP		X
Document Management Systems		
> Domino.Doc	X	X*
> Hummingbird DOCS Open	X	
> iManage	X	X*
> OpenText Livelink	X	
> Documentum	X	X*
> Other ODMA document management systems	X	
Network Fax		
> Biscom FAXCOM	X	X
> Captaris RightFax	X	X
> Omtool Fax Sr	X	X
> Other commercially available fax server products	X	X
Cost Recovery		
> Equitrac		X*
> Copitrak		X*
OCR		
> ReadIRIS	X	X
> ScanSoft OmniPage	X	
> ScanSoft TextBridge	X	
> Others that support Group 4 multi-page TIFF products	X	

CANON imageRUNNERS INTEGRATED WITH eCopy SCANSTATION

Color	
> C3200	
Workgroup	
> 210, 330, 2200, 2800, 3250, 3300	
Department	
> 400, 5000, 6000	
Production	
> 7200, 8500, 105	

CANON DOCUMENT SCANNERS AND MICROFILM READERS

Document Scanners	
> DR-2080C, DR-3060, DR-3080C, DR-4580U, DR-5020, DR-5060F, DR-5080C	
Microfilm Readers	
> MS-400, MS-500, MS-800
